Feminine Hygiene Wash

The feminine intimate area has a natural protective layer which is acidic in nature and prevents infection. Good bacteria found in the vagina called Lactobacilli produce Lactic acid (or milk acid). This maintains the protective layer and the acidic environment of pH 3.5 to 4.5. Hence, it promotes the growth of Lactobacilli, inhibiting the presence of harmful bacteria and preventing infection .

- ◇ Maintains Vaginal Flora at pH 3.5
- ◇ Prevents Dryness, Itchiness & Irritation
- ◇ Provides Nutrients
- ◇ Gives Soothing Effect
- ◇ Anti Bacterial Property
- ◇ Sulphate Free Formulation
